

POSTER SESSION- CONFERENCE HALL –July 28, 2010

| No. | Author(s) | Paper |
|-----|---|--|
| 1 | Claudia Gidea | <i>A model for simulating the electrical activity of the heart based on the standard map dynamics</i> |
| 2 | Sinem Gözde Defterli, Ahmet Mavuş | <i>The Autonomous Waste Sorter</i> |
| 3 | Armagan Bayram | <i>System Dynamic Approach On Managing Blood Cholesterol Level</i> |
| 4 | Voicu Dolocan | <i>Quantum mechanical treatment of the Lamb shift without taken into account the electric charge.</i> |
| 5 | Ammar Medoued | <i>Monitoring techniques of Induction Motors Faults</i> |
| 6 | Lynda Bouchemakh | <i>Speckle filtering in radar polarimetric images by wavelet transform in complex domain</i> |
| 7 | Mikhail Timoshin | <i>Dynamical Symmetries of Second Order</i> |
| 8 | Sacide Altıntoz , Incilay Süslü, Mustafa Çelebier | <i>Application And Comparison Of Two Different Analytical Techniques To The Complex Matrix Systems For The Analysis Of A Active Drug Compound Rosuvastatin Calcium</i> |
| 9 | Ahmet Yıldırım, Sefa Anıl Sezer | <i>An efficient numerical algorithm for solving three-dimensional Navier–Stokes equations for the flow near an infinite rotating disk</i> |
| 10 | Canan Ünlü, Ahmet Yıldırım, Sefa Anıl Sezer | <i>Reliable analysis for solving the system of nonlinear integral-differential equations</i> |
| 11 | Deniz Bostanbaş, Hüseyin Koçak, Ahmet Yıldırım | <i>A study of a delay differential equation arising in electrodynamics</i> |
| 12 | Funda Erşen, Ahmet Yıldırım, Sefa Anıl Sezer | <i>Solutions of the MHD flow over a non-linear stretching sheet by using HPM-Padé technique</i> |
| 13 | İsmihan Yıkar, Ahmet Yıldırım, Selin Sarıaydın | <i>Non-perturbative solution of Burgers' and good Boussinesq equations using HPM–Padé technique</i> |
| 14 | Melek Sofyalıoğlu, Ahmet Yıldırım, Hüseyin Koçak | <i>An analytical technique for the space-time fractional advection-dispersion equation</i> |
| 15 | Meltem Turan , Ahmet Yıldırım, Sefa Anıl Sezer | <i>A numerical analysis for effects of partial slip on the peristaltic flow of a MHD Newtonian fluid in an asymmetric channel</i> |
| 16 | Neslişah İmamoğlu, Ahmet Yıldırım, Sefa Anıl Sezer | <i>An efficient numerical method for solving linear and non-linear space–time fractional reaction–diffusion equations</i> |
| 17 | Pelin Helvacı, Ahmet Yıldırım, Alev Kelleci | <i>Numerical Solution of coupled Burgers' equation by using HPM-Pade Technique</i> |
| 18 | Semiha Özgül, Ahmet Yıldırım, Hüseyin Koçak | <i>Analytical solution of the Blaszk-Marciniak lattice</i> |
| 19 | Yağmur Gülkanat, Ahmet Yıldırım | <i>Numerical simulation of a fractional population growth model</i> |
| 20 | Yasemin Kara , Ahmet Yıldırım, Alev Kelleci | <i>An algorithm for solving the system of nonlinear ordinary differential equations arising in kinetic modeling of lactic acid fermentation and epidemic model</i> |
| 21 | Zehra Pınar, Ahmet Yıldırım | <i>Solutions of Nonlinear Reaction-Diffusion Equations arising in Mathematical Biology by Exp-function Method</i> |
| 22 | Samia Harrouni | <i>Fractal Analysis to Quantify Wind Speed Fluctuations</i> |
| 23 | Ouarda Raaf | <i>Motion Analysis Of Rainy Cells Observed In Weather Radar Images</i> |
| 24 | Erdal Dinç, Dumitru Baleanu, Mihaela-Cristina Baleanu | <i>On a new application of the continuous and discrete wavelet transforms to the spectrophotometric determination of ramipril and hydrochlorothiazide in a mixture</i> |
| 25 | Erdal Dinç,Dumitru Baleanu, Ali Osman Solak, Haslet Ekşi, Remziye Güzel | <i>Factor analysis for the characterization of the nano-surface of the nitroazobenzen-modified glassy carbon electrode</i> |
